

TriStar

Engineered Plastic Solutions™

Operations Update

March 23, 2020

All areas of our country are being subjected to statewide “shelter in place” orders. TriStar is considered an essential business supplying our nation’s critical infrastructure; we remain open and are running normal manufacturing operations nationally.

As a precaution all non-manufacturing personnel whose jobs can be managed from home have been put into effect. In addition, we are limiting visitor access to our facilities temporarily to only those visitors who have an absolute business need to be onsite.

As this situation evolves, we will continue to monitor it and update information as necessary.

We appreciate your partnership.

Stay safe.

Richard Cedrone | CEO

David Mello | President
