

TriStar

Engineered Plastic Solutions™

Operations Update

Most areas of our country are subject to statewide “shelter in place” orders. TriStar is considered an essential business supplying our nation’s critical infrastructure; we remain open and are running normal manufacturing operations nationally.

As a precaution, all non-manufacturing personnel whose jobs can be managed from home have been asked to work remotely. In addition, we are limiting visitor access to our facilities temporarily to only those visitors who have an absolute business need to be on site.

As this situation evolves, we will continue to monitor it and update information as necessary.

We appreciate your partnership.

Stay safe.

Richard Cedrone | CEO

David Mello | President
